PROFESSIONAL SUMMARY

Mozhiarasu Vettriselvan

Machine Learning Engineer (Generative AI)

Email: mozhiarsuvettriselvan@gmail.com | Phone: +91-9786417444

GitHub: <https://github.com/mozhiarsuvettriselvan-code>

LinkedIn: <https://www.linkedin.com/in/mozhiarsu-vettriselvan>

Professional Summary

Computer Science student with a strong interest in Machine Learning and Generative AI, currently building foundational skills through hands-on projects in NLP and data analysis. Experienced in data preprocessing, model development, and implementing learning solutions for text-based applications such as spam detection and sentiment analysis. Familiar with basic Deep Learning concepts, performance optimization techniques, and machine learning frameworks including TensorFlow and PyTorch, with a focus on developing efficient predictive systems.

Technical Skills

- **Programming Languages:** Python, JavaScript, HTML, CSS
- **Machine Learning:** Supervised Learning, Model Development, Predictions, Optimization, Performance Tuning
- **Deep Learning:** Neural Network Architectures (Familiar), TensorFlow (Familiar), PyTorch (Familiar)
- **NLP & Intelligent Systems:** Text Analysis, Chatbots, TF-IDF Vectorization
- **Data Science:** Data Collection, Analysis Tools, Data Preprocessing
- **Frameworks & Tools:** Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
- **Implementation:** ML Model Implementation, Developing AI Applications & Systems
- **Web Technologies:** React.js

Projects

1. Spam Message Classification using Machine Learning & NLP
 - Developed an intelligent system for spam detection using NLP techniques.
 - Performed data collection and preprocessing to build efficient learning solutions.

- Implemented TF-IDF based feature extraction for model development.
- Trained and optimized a Multinomial Naive Bayes classifier for predictions.
- Conducted performance tuning and evaluation using classification metrics.
- Achieved 95.5% accuracy in spam message classification.
- **GitHub:**
<https://github.com/mozhiarsuvettriselvan-code/spam-nlp-classifier>

2. PrimeTrade Trader Behavior & Market Sentiment Analysis

EXPERIENCE

intern

inspire solutions, India, chennai

May 2025 - July 2025

Inspire Solutions

- Trained in Full Stack Web Development using Python and Django framework.
- Developed backend functionalities and implemented CRUD operations using Django.
- Worked with databases for data storage and retrieval.
- Integrated frontend components with backend services to build dynamic web applications.
- Gained experience in RESTful API development and user authentication systems.

EDUCATION

Bachelor of Science (BS), AGURCHAND MANMULL JAIN COLLEGE, india, Chennai

2023 - Now
